Janitronics Building Services has been serving the Boston area since 1977.

A Message from the Founder

Over a hundred years ago, my grandfather and great-grandfather left Budapest, Hungary, for the United States. They spoke no English but were able to find work as window washers in Boston. My grandfather saved enough money to bring over his eight brothers and sisters. Eventually, they started their own company, Corporation Window Cleaning. Janitronics Building Services grew from this seed.

The story of how my family became part of the American Dream is incredible. One statement sums up what I learned from my grandfather and father: "Never burn a bridge, and treat those you work with as respectfully as those you work for." I credit this philosophy with our success today.

—Donald Brecher, Founder of Janitronics Building Services

Who We Are

Janitronics is serious about building services.

Our Experience & Philosophy

Locally owned and operated, Janitronics Building Services has provided responsive, comprehensive building services for four generations. The keys to our longevity:

- We see ourselves as a partner, not only a vendor.
- We understand the vital role of maintenance in keeping tenants happy and protecting capital assets.
- We apply sound management principles to building systems.
- We deliver a high level of service.

A building is a living, breathing entity. It affects the lives of everyone who enters or inhabits it. We know how to make a workplace comfortable, functional, efficient, and safe—by analyzing requirements, anticipating needs, and providing the right resources.

Our clients are primarily real estate developers; property management companies; corporate headquarters; and biotechnology, pharmaceutical, and health-care firms. A clean, orderly environment helps these organizations attract the best employees, maximize productivity, and make a positive impression on visitors.

Who We Are

At Janitronics Building Services, we have identified and mastered five factors that lead to client satisfaction:

Service

Janitronics Building Services is dedicated to offering quality support to our clients, who share our standards of excellence.

Accountability

Our management network provides built-in accountability through interlocking levels of responsibility and careful checks on work.

Control

Through close monitoring and reporting, we track scheduled jobs and confirm when they are completed.

Communication

Consistent communication builds relationships, preempts issues, and helps us continually improve our quality of service.

Personnel

We do everything we can to make sure our employees at all levels, from cleaning crew to executive management, fulfill our clients' needs.

Who We Are

The Janitronics Building Services Advantage

Numerous areas distinguish Janitronics as the top choice for building services in the greater Boston area:

Decades of Experience

Since 1977, we have offered custom services for first-class office buildings; retail developments; corporate facilities; and high-technology and biotechnology firms.

Customer Attention

Our focus on the greater Boston area allows us to develop close-knit working relationships with clients, many of whom have been our partners for over thirty years.

Management and Maintenance

We have the most layered management structure in the industry, with a maintenance system that schedules, tracks, and verifies completion of work.

Safety and Green Programs

We have developed proven safety protocols, with an emphasis on environmentally sound equipment, products, and procedures.

Emergency Services

We have the best 24/7 emergency response plan in the area, with employees skilled to handle floods, fires, bomb threats, evacuations, snow removal, and other major issues.

A Competent, Fully Trained Workforce

We understand the sensitive nature of your business and take every measure to ensure qualified people are working in your building.

Benefits of having our personnel work for you:

- They are *our* employees.
- We use the most extensive employee background checks in the industry.
- You are not responsible for any direct employee benefits.
- Our employees receive above-average hourly wages; health insurance; pension plans; vacation, holiday, and sick days; and contributions to education funds.
- Because of our size, we can augment your existing workforce at times of high demand.

What We Do

Janitronics offers so much more than a commercial cleaning program.

Commercial Cleaning

A comprehensive building services program is crucial to maintaining the value of today's office, facility, and retail environments. Janitronics provides a complete menu of services, from general housekeeping to specialized offerings and techniques. Should your needs exceed our portfolio, we can recommend a qualified subcontractor and work with them on your behalf.

Janitorial Services

Janitronics offers a full selection of janitorial services. We also have a partnership with Blu Planet Supply, a janitorial supply company that can provide everything from facial tissues to disinfectant soaps to kitchen supplies to wastebaskets. Contact us for professional cleaning of:

- Workstations and boardrooms
- Carpets
- Lobby matting
- Blinds
- Fabric furniture and partitions
- Interior glass partitions
- Kitchens, including refrigerators and microwaves
- Cafeteria hoods, appliances, walls, and other fixtures
- Restrooms and showers
- Fitness centers
- Escalator treads and risers

Additional janitorial services:

- Recycling
- Kitchen inventory
- Dishwashing
- Daily towel service
- Mail room
- Inventory control
- Document disposal
- Medical waste disposal
- Hard floor maintenance and restoration
- Wood and leather furniture polishing and repair
- Relamping (changing light bulbs)

What We Do

Detail Work

Janitronics Building Services performs meticulous project work, such as cleaning blinds, furniture, and kitchens; major cleanups after moving or construction; and all kinds of exacting floor work, from maintaining carpets to refinishing vinyl composite tile, stone, and ceramic flooring.

Carpet Restoration and Maintenance

Fresh carpets can uplift the look and feel of an entire office, and vacuuming is not enough to keep carpets clean. Periodic deep cleansing, using either extraction or dry-cleaning, is necessary. Janitronics Building Services offers customized maintenance programs as well as one-time cleaning, including protective treatments.

Hard Floor Restoration and Maintenance

The Special Services Division at Janitronics focuses on the restoration, cleaning, polishing, and ongoing maintenance of hard-surface flooring. Our restoration procedures can save you from having to do a complete renovation of flooring in restrooms, lobbies, and manufacturing areas. We have expertise in the following types of hard floors:

- Wood
- Ceramic
- Marble
- Granite
- Terrazzo
- Quarry
- Polished concrete
- Vinyl composite
- Rubber flooring
- Linoleum
- Pool decking

What We Do

Emergency Services

When disaster strikes, every minute counts. Janitronics Building Services personnel are standing by 24/7 with a rapid response to damage resulting from water, fire, smoke, mold, storm, or collapse. Our managers are accustomed to dealing with complex insurance claim requirements and processes, simplifying the experience for you. Our emergency services include:

- Snow removal
- Safety inspection and evaluation
- Site stabilization and containment
- Boarding up/fencing
- Water extraction and moisture survey
- Thermal image investigation
- Structural drying and dehumidifying
- Corrosion control
- Selective demolition
- Detailed cleaning and deodorizing
- Hazardous material cleanup and removal
- Dry ice blasting to remove stains, rust, and mold from building exteriors
- HEPA vacuuming
- Installation and rental of air movers and negative air movers

Specialty Services

In addition to our commercial janitorial services, Janitronics offers the following specialty services:

- Full- and part-time labor for manufacturing areas
- Post-construction cleaning
- Cleanroom and GMP services
- LEED certification assistance

What We Do

Exterior Cleaning

It takes just seconds for someone to form an impression of your building, which is why Janitronics cares so much about how it looks from the *outside*.

Our exterior services include:

- Window washing
- Garage and parking lot sweeping and pressure-washing
- Graffiti and gum removal
- Tensabarrier® and security rope cleaning
- Landscape maintenance

Day Porter Services

Day Porters and Matrons become an integral part of your on-site team. Many of our employees become your trusted partners and have worked at client locations for many years. Companies use our personnel to perform a variety of office tasks, including:

- Concierge services
- Function setup
- Cleanup before and after meetings
- Food service
- Cleaning and restocking kitchenettes
- Maintaining paper supplies for copiers and printers
- Mail delivery
- Moving boxes and furniture
- Relamping (changing light bulbs)
- Policing lobbies and restrooms
- Operating freight elevators

Moving Services

Moving is recognized as one of life's most stressful events, but Janitronics can help make the process go more smoothly. Our moving services include:

- Crate rental
- Internal office moves
- Box trucks and movers
- Post-move cleaning
- Providing trash, composting and copy-center recycle baskets

What We Do

Construction Cleaning

New facilities are being built in Greater Boston to serve flourishing markets such as education, life sciences, medicine, and biotechnology. Since 1977, Janitronics has been the most reliable construction-cleaning company in New England. Our services remain unrivaled in the industry, due to our focus on training, quality, supervision, safety, and client satisfaction.

Our Construction Clients

Janitronics works closely with the best design and construction teams in the region, including general contractors, architects, and property owners. Catering to 21st-century companies, we understand the requirements of sophisticated buildouts such as secure executive suites, R&D labs, and controlled manufacturing spaces.

On-Site When You Need Us

Don't let dust and debris distract from your construction project. Janitronics works as your partner in scheduling phased and final cleaning: before the initial walk-through, after punch-list items have been addressed, and prior to sign-off. We often work through the night ahead of inspection deadlines. We can also provide labor to aid construction crews.

What We Do

Our Construction-Site Services

Janitronics Building Services can handle construction-cleaning projects of any size. After meeting with you to understand your needs, we prepare a detailed scope of work that will ensure a spotless result. We start with the basics:

- Trash removal
- Scrubbing restroom walls and floors
- Window washing
- Sweeping
- Detailed vacuum and shampoo of carpets
- Detailed cleaning of case goods
- High-end finish work
- Window blinds

We also offer:

- Drywall removal
- Aerial lifts
- Cleaning light fixtures
- High dusting
- Stripping and refinishing all types of hard-floor surfaces
- Cleaning and polishing metal
- Cleaning exterior stone surfaces
- Pressure-washing sidewalks and garages
- Daily cleaning of construction trailers and construction site offices
- Specialized cleaning for GMP environments

What We Do

Biotechnology, Life Sciences & Cleanrooms

At Janitronics Building Services, we are experts in cleaning and disinfecting the complicated environments common to biotechnology, life sciences, and manufacturing. We understand that facilities and equipment must be cleaned to ensure product safety according to “good practice” guidelines and regulations.

Janitronics can execute an existing program or develop one to meet your requirements and SOPs (standard operating procedures). We will ensure your space is cleaned and work is documented for the FDA and other international regulatory agencies.

What We Do

Our Life Science Markets

Janitronics Building Services takes a hands-on approach that has secured strong and lasting partnerships with clients in a variety of specialized industries:

Pharmaceuticals

We minimize the risk of product contamination by adhering to proven and verifiable decontamination protocols, and documenting our work to ensure regulatory compliance.

Biotechnology and Medical Devices

We perform routine cleaning that eliminates cross contamination between experiments, maintains R&D efficiency, and protects the production of medical devices.

Vivarium and Life Sciences

We provide cleaning services that are safe for employees, animals, equipment, and the environment, including cage washing and husbandry.

Manufacturing

Our technicians clean and maintain production environments according to CGMP (Current Good Manufacturing Practice) protocols.

Semiconductor Manufacturing

Janitronics understands the unique nature of semiconductor device fabrication; we clean facilities aseptically while protecting this sensitive process from electrostatic charge.

What We Do

Our Life Science Services

At Janitronics Building Services, we continuously strive to deliver the latest in equipment, supplies, technology, and training.

Life Science Cleaning

We provide manual cleaning and disinfecting in accordance with CGMP regulations and our clients' SOPs, for the following:

- Controlled environments such as GMP cleanrooms, biotech areas, medical device areas, and formulation areas (levels 1–3)
- Packaging areas
- R&D areas
- Glass washers and autoclave equipment
- Virology areas
- Vivariums
- Quality control areas
- Laboratories (biosafety levels 1 and 2)
- Pass-through cabinets and equipment airlocks, including dollies, carts, and related mobile equipment (levels 1–3)
- Gowning areas (levels 1 and 2)
- Warehouse and storage areas, including floors, racks, and offices (both horizontal and vertical surfaces)
- Surfaces including walls, ceilings, floors, fixtures, and equipment
- Stainless steel tanks, piping fixtures, and other architectural surfaces (cleaning and polishing)
- Cold rooms
- Mold remediation (cold rooms, laboratories, and manufacturing areas)
- Hazardous waste removal
- Construction sites (phases I–III)
- Controlled, not classified

What We Do

Life Science Technology

We are familiar with the use of major database platforms and learning management systems, including ISOtrain, eDOCS, MYCIMS, and SumTotal.

Life Science Consulting

With our partners in industry leadership, Janitronics is available to review and develop cleaning SOPs, perform weekly quality walk-throughs, and conduct routine audits.

What We Do

Our Biotech Staff

Our crews receive instructor-led, online, and on-the-job training to follow procedures for the most detailed SOPs and specifications. Employees undergo all required and supplemental training based on their individual schedules. Under the oversight of our compliance team, all services are performed efficiently, safely, with your SOP, and in accordance with state and federal laws.

Typical Janitronics job description for a GMP cleanroom technician:

JOB TITLE: Janitronics GMP Cleanroom Technician

DEPARTMENT: Facilities/Manufacturing/Site Services

BROAD FUNCTION: Responsible as a team member for housekeeping/sanitation maintenance of cleanrooms and controlled environments in manufacturing areas, virology, and QC areas, in addition to materials management and QA areas.

KEY RESPONSIBILITIES AND TASKS: Ensure that all practices, procedures, standards, and regulations set forth by the client's manufacturing, quality, materials management, and EH&S departments are performed in a responsible manner to guarantee a clean, safe, and audit-ready state in ISO5, ISO6, ISO7, and ISO8 cleanrooms and controlled environments.

- Clean and maintain classified and controlled areas on a daily, weekly, and monthly basis, following cleaning procedures set forth by the client's manufacturing department.
- Clean and maintain classified and controlled areas on a daily, weekly, monthly, and quarterly basis, following cleaning procedures set forth by the client's materials management and QA departments.
- Clean and maintain controlled areas on a daily, weekly, monthly, and quarterly basis following cleaning procedures set forth by client's virology and QC departments.
- Keep training records current and perform self-training on a daily basis on all practices, procedures, standards, and regulations as set forth by the client's QC department. Follow assigned curriculum on ISOtrain, eDOCS and MYCIMS software.
- Report daily to the Janitronics management team with progress and status of periodic work and training.

What We Do

How We Work

Our layered management structure delivers excellence.

Our Management Network

At Janitronics Building Services, the ratio of line workers to managers is the most favorable in the industry. Our layered chain of command ensures constant checks on the quality of work and prompt resolution of any problems or requests. Managers visit properties on a frequent basis, creating a positive experience for tenants and employees. Many members of our management team have worked their way up through the organization.

Account Managers

A qualified Account Manager is dedicated to each property.

Account Managers:

- Ensure all employees adhere to the practices, standards, and regulations set forth by Janitronics and the client
- Act as a liaison between the client and tenants or facility departments to handle any problems or special requests
- Make certain all scheduled maintenance is performed according to specifications
- Keep work records to certify periodic services are performed
- Communicate with clients to review services that need to be performed
- Inspect all storage closets and keep equipment and supplies safe and orderly
- Report to the District Manager on a regular basis to discuss performance, personnel, special requests from tenants or management, condition of equipment, ordering of supplies, and progress of periodic work

How We Work

Area Managers

We select motivated Janitronics employees to become Area Managers. We limit the geographical footprint and number of properties each Area Manager oversees.

Area Managers:

- Communicate with clients to assure total satisfaction
- Visit clients regularly, during business hours, to address any issues and to schedule special requests
- Report to the District Manager daily to discuss client comments and requests, status of periodic work, and supply requisitions
- Manage team members to ensure they have the education, equipment, and support to be successful

District Managers

Like Area Managers, District Managers rise through the ranks at Janitronics. These highly skilled individuals are responsible for three or four Area Managers, focusing exclusively on the properties and employees in their region.

District Managers:

- Coordinate all Janitronics activities in their respective territories
- Meet with clients on a regular basis to monitor the quality of work and, in particular, the responsiveness of Area Managers
- Communicate with property and facility managers on a regular basis
- Review quality control reports
- Schedule periodic tasks with Area Managers to ensure all program requirements are fulfilled
- Make periodic site visits with Area Managers
- Communicate daily with Area Managers in their territories
- Communicate daily with executive management

How We Work

Executive Managers

Our executive team is comprised almost entirely of former facilities and property managers. They understand the issues and concerns our clients face every day. Executive managers are directly involved with all tiers of our business and visit properties on a frequent basis.

How We Work

Our Employees

At Janitronics Building Services, we know that client satisfaction is the responsibility of everyone from line workers to executives. Therefore, we have instituted an ongoing program to recruit, train, and develop competent, skilled and trustworthy employees.

Recruiting and Hiring

Like most companies, we collect and review job applications, and then offer employment to candidates who match our hiring needs. Our primary recruiters are current employees. Our existing workers are eager to bring their friends and family into the organization. We are proud to afford opportunities to individuals with a real desire to succeed.

Employment Eligibility

Janitronics complies with the rules and regulations set forth by the United States Department of Homeland Security pertaining to employment eligibility verification. All new hires complete Form I-9 and have their Social Security number validated through E-Verify. We maintain a tracking system for employees whose eligibility must be rechecked. We also perform in-house and independent audits to ensure conformity to all retention rules for employee documentation.

Background Checks

Employees undergo county, state, and national felony criminal history checks, including a seven-year history for all state and federal databases and the National Sex Offender Registry.

How We Work

Orientation and Training

At Janitronics Building Services, we work closely with employees to help them navigate employment, understand their roles and obligations, and enjoy a safe and pleasant work experience.

Policies, Rules & Regulations

New employees receive a complete orientation with special attention to our methodology and commitment to client satisfaction. Each successful candidate is provided with the Janitronics Employee Manual, which includes our general rules of conduct and sexual harassment policy.

Safety and Risk Management

Our training and development programs emphasize the safe and efficient use of resources. We have established a corporate policy that defines our safety philosophy and inform all employees of their individual responsibilities in carrying it out. In addition to training, we provide employees with the safest equipment and supplies with which to perform their jobs.

How We Work

Job Training

Before assuming their duties, new employees are thoroughly trained in the use of all tools, equipment, and cleaning agents they will use. They also complete a rigorous safety training program to help safeguard them on the job as well as protect the occupants of our clients' buildings. Supervisory personnel receive training in serving clients, forging relationships with tenants, and managing line workers.

Development

Good management, above-average wages and benefits, and safe working conditions are central to maintaining a stable, competent workforce with low turnover. Our policy is to develop employees through continued training so we can promote from within. A minimum of sixteen hours of ongoing training per year is provided in monthly modules, appropriate for each property.

How We Work

The Transition Process

For decades, Janitronics Building Services has been transitioning properties from start-ups to those as large as two million square feet to our services. We have developed an approach that ensures an orderly changeover from day one. Extra effort up front solves potential problems before they happen:

1. We form a transition **team**.
2. We review your company's **needs** with you, interviewing your tenants or department heads to determine their individual requirements.
3. We develop a **plan** that includes the following:
 - A building-specific schedule of services with a complete inventory of supply, equipment, and storage needs
 - A baseline quality control rating with a step-by-step program for immediate improvement
 - Designation of a site crew with experience working as a team
 - Building-specific training for supervisors and crew
4. We identify areas you feel would make an immediate positive **impact**. We have found the best way to get employees and tenants on board with a new system is to implement inspiring changes they will notice right away.
5. We take over maintenance of the property on a **weekend**, so results are clear to everyone Monday morning.

How We Work

Making A Difference

Why We Make A Difference

Janitronics Building Services is a socially conscious organization that cares about people, community and our planet. We take a science driven approach to our cleaning and disinfecting program to help ensure safe and healthy buildings and properties.

How We Make A Difference

Janitronics plays a critical role in our client's success to operate a safe and healthy facility. Clients, customers, visitors and our staff must feel safe and secure in their workplaces in order to have a positive experience and achieve their own organizational goals. Janitronics focuses on "Cleaning for Health" by performing scientifically driven cleaning and disinfecting processes and techniques.

Where We Make A Difference

Janitronics helps to promote healthy buildings and properties where clients, customers, visitors and staff feel comfortable and safe to work, socialize and visit. We care about our work and family communities.

Green Cleaning Commitment

Janitronics has developed, performs and continues to improve the Green Cleaning Standard. We commit to be moral stewards of our environment and lead with a focus on sustainability. We care about our planet. Our staff complete a rigorous training program through our learning management system (LMS), hands on technical training and classroom setting formats. This ensures each employee develops the knowledge and understands the importance of our role in keeping buildings healthy and safe. We utilize industry leading equipment, tools and products that meet or exceed the Green Cleaning standard.

Making A Difference

Industry Leadership and Best Practices

Janitronics Building Services is an active member of the U.S. Green Building Council (USGBC), International Sanitary Supply Association (ISSA) and the International WELL Building Institute (IWBI) Health Security Task Force. We collaborate and promote industry best practices to achieve human and environmental health. Our policy is to purchase and utilize equipment, tools and products that reduce the negative impacts on human and environmental health. We consider the short term, as well as the long term, life-cycle effects from:

- . Building materials
- . Ventilation and filtration
- . Pollution
- . Waste generation
- . Energy consumption
- . Recycled material content
- . Depletion of natural resources
- . Environmental health

Third Party Verification

Janitronics Green Cleaning Program has been reviewed and verified by third party market leading consulting groups: The Ashkin Group and The Leonardo Academy.

Making A Difference

Continuous Improvement and Development

We continue to live our Green Cleaning Commitment through innovation and our forward-thinking culture. We always lead by example, seeking out and utilizing the most innovative equipment, products, tools, processes and techniques. The most critical element of our cleaning and disinfecting program is training. Our staff are highly skilled cleaning professionals who participate regularly in the following training modules:

Employee Training and Development

- Green Cleaning standard
- Green Cleaning processes and techniques
- Green Cleaning products (Green Seal Certified)
- Green Cleaning product dispensing system
- Green Cleaning equipment and tools
 - Micro fiber pads
 - Micro fiber mops
 - Micro fiber dusting systems
 - High filtration vacuum cleaners (HEPA Filters)
- Water conservation
- Recycling and composting

Making A Difference

Industry Leadership

Janitronics Building Services believes certification recognizes competency and reflects the sustainability commitment of our organization. We have worked with The Ashkin Group, Leonardo Academy, and other accredited entities to assist our clients in obtaining LEED certification, including the LEED Platinum rating. We are also able to support WELL achievement and the Fitwel certification. The WELL certification demonstrates a building's commitment to the health of their users. Multiple members of our management team are accredited Fitwel Ambassadors by the Center for Active Design.

Examples of our efforts:

- Achieved **green cleaning-custodial effectiveness credit**.
- Achieved the **solid waste management policy credit**: we collected, sorted, and weighed waste in order to identify recycling opportunities.
- Achieved the **green cleaning – sustainable equipment credit** by implementing the use of janitorial equipment such as HEPA vacuums, microfiber cloths and mops that help reduce building contaminants and minimize environmental impact.
- Implemented a sustainable purchasing program for cleaning equipment and products.

Making A Difference

The Community

Janitronics Building Services participates in numerous real estate, biotech, business, and green building organizations. We value the strong relationships we have formed within the neighborhood, community, and region.

Our association with NAIOP includes a corporate membership. This organization helps us to follow Real Estate and Development trends. Our strong association with NAIOP also allows us to work with client partners and potential clients on programs, events and education.

BOMA Boston represents commercial real estate professionals in Greater Boston who own, manage or service the established and developing real estate environment. Twelve of our employees are members of BOMA Boston. Seven sit on committees and another sits on the Board of Directors, which help to shape and maintain the growth of the organization, educational programs and its heavy event schedule.

We are a member of IFMA Boston, the International Facilities Management Association, a professional organization dedicated to advancing the facility management profession and supporting members of the building environment community.

We joined the Massachusetts Biotechnology Council in order to support our work in the Biotechnology and Life Sciences sectors. As a member of this organization, we are able to keep up with the industry trends, stay educated and informed, and build our relationship within the industry.

We are also supporters of MassBio's non-profit arm, MassBioEd, a foundation which supports educational programs and workforce development in various roles in the Life Sciences industry including programs for high school and college students.

We are a corporate member of MassEcon, the state's private sector partner in promoting Massachusetts as the premier location for business growth. Since their founding in 1993, MassEcon has worked to ensure that business stays, grows and thrives in the Commonwealth. They are a non-profit, non-partisan organization which has brought many new companies and development to Massachusetts. Dorrian Fragola is also a member of the Board.

Making A Difference

To support and network with the many clients we have in the Cambridge market, we are a member of the Cambridge Chamber of Commerce.

We proudly support the U.S. Green Building Council and practices all GreenClean programs. We have several LEED AP Client Services Professionals who assist many of our clients in obtaining LEED Certifications.

We are a member of the Back Bay Association, which supports many neighborhood initiatives.

We actively support Boston Children's Hospital. Specifically we support their fundraising by making generous contributions and participating in their events. Boston Children's has been named the country's #1 pediatric hospital by U.S. News & World Report, seven years running. This milestone is a testament to their fierce commitment to families, and the trust they place in the Hospital to deliver care when it matters most and Janitronics Building Services is proud to support their efforts.

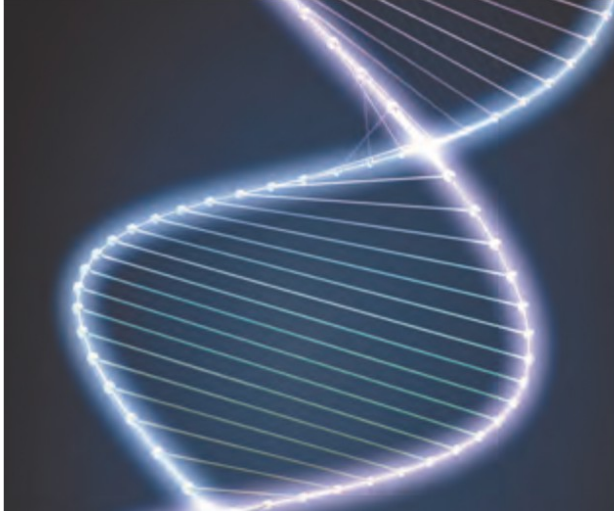

We support Building Impact, a non-profit organization dedicated to fostering volunteerism in the buildings we maintain. One of our executive staff serves as a member of the board and our clients are involved as well.

We are very proud of our philanthropic commitment to the area we serve and have donated to many charitable organizations within the community. Janitronics Building Services has been recognized as one of the largest corporate contributors in the region by the Boston Business Journal for many years.

Contact

At Janitronics Building Services, we believe that meeting expectations is a matter of planning, performance, and resources. We welcome the opportunity to fulfill your janitorial needs.
